Ravensworth House

Internal Glass Balustrade & Handrail.

Project: Ravensworth House, Gateshead
Completion Date: 2025

We designed and installed a custom internal glass balustrade for Brims Construction's modern headquarters. Using 21.5mm toughened laminated glass with sleek aluminium fittings and powder coated handrails, the system balances safety and minimalist design.

Tested to meet commercial standards, it enhances natural light and maintains an open, professional office environment.

Tynemouth Castle Inn

Completed in 2024, we designed, fabricated, and installed durable external balcony and ramp balustrades. Our curved balustrades matched the Art Deco style, and high-performance coatings protected against salt corrosion. The installation offers clear coastal views while meeting safety and accessibility standards, enhancing the building's historic charm.

Mowgli Newcastle

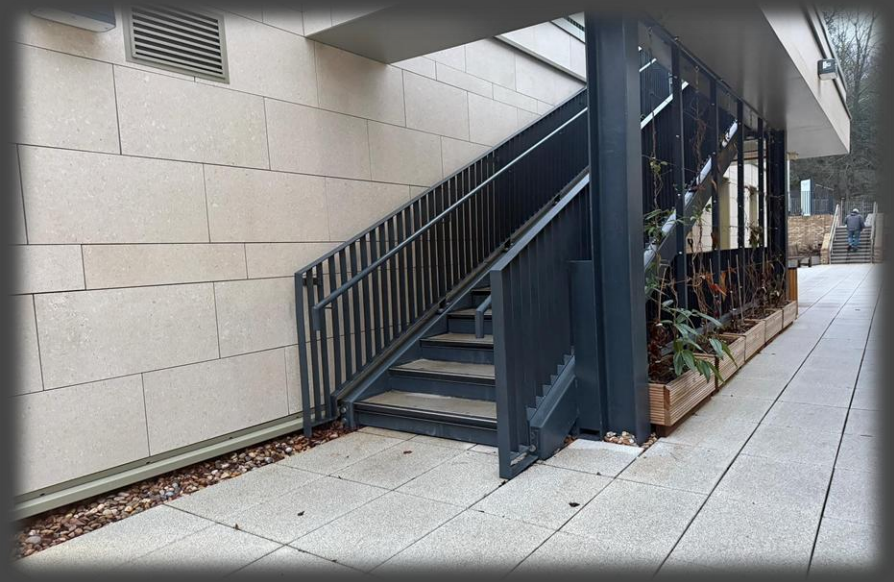

Staircase, Balustrade & Handrails.

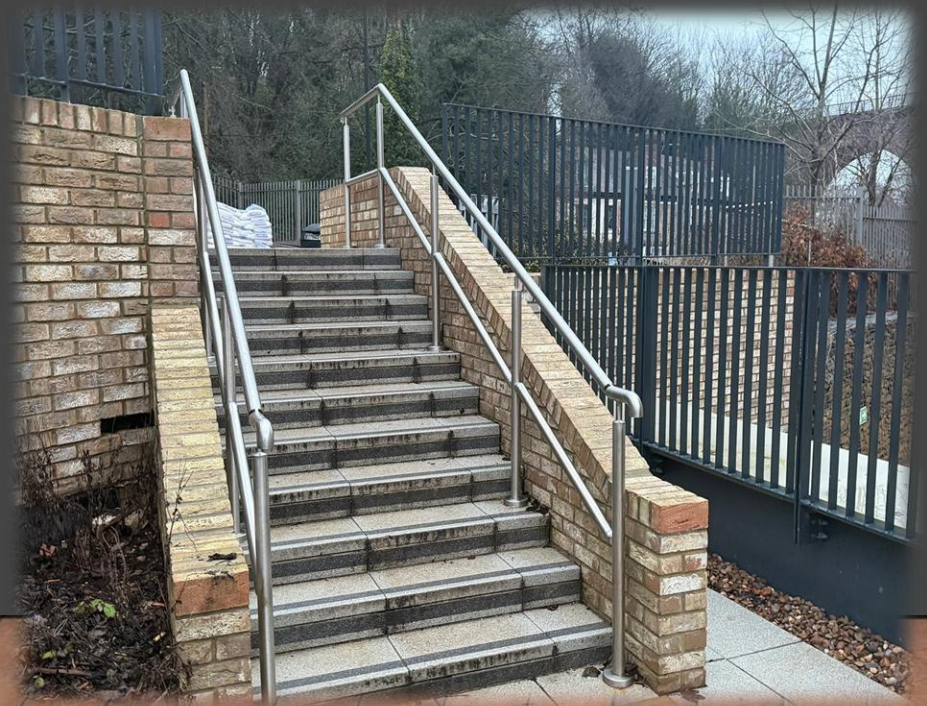

Completion Date: 2025
Design, fabrication, and installation of decorative internal balustrades and a curved staircase.

For Mowgli's interior, we created metalwork that blends traditional blacksmithing with modern engineering to support a busy mezzanine and staircase. Custom scrollwork panels and twisted metal spindles were crafted with a textured patina finish to complement the restaurant's rustic style. The metalwork integrates seamlessly with distinctive rope accents and lighting, becoming a key visual and structural element in the space.
